# Get a handle on

**complex food handling environments.**

Commercial food handling accounts are complex. Count on Bayer to give you the flexibility to tackle even the most difficult environments with science-based pest solutions that are easy to execute.

**Suspend<sup>®</sup>**  
**POLYZONE<sup>™</sup>**

**Maxforce<sup>®</sup>**

## Take pest management in food handling to the next level.

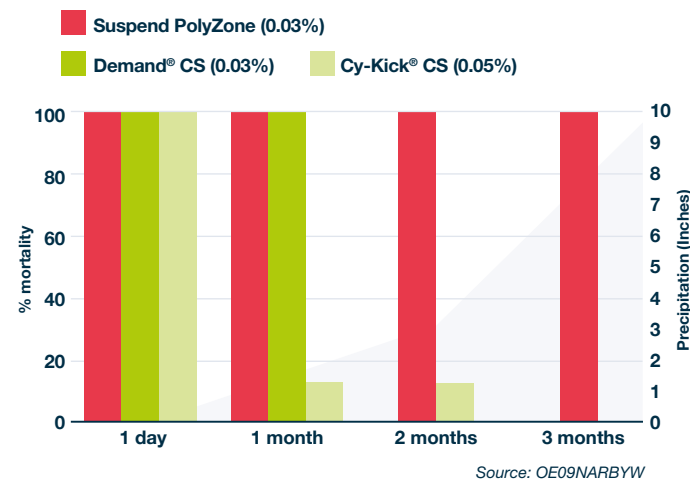

Pest management is a critical component within the food supply system nationwide. In commercial food handling, each environment is different and can present its own challenges. So, to get the best results, there is no one-size-fits-all solution.

By combining the unstoppable staying power of Suspend® PolyZone® with the original Maxforce® Roach Control System, you have the strength, residual and flexibility you need to tackle even the most complex food handling accounts.

### /// Suspend® PolyZone®

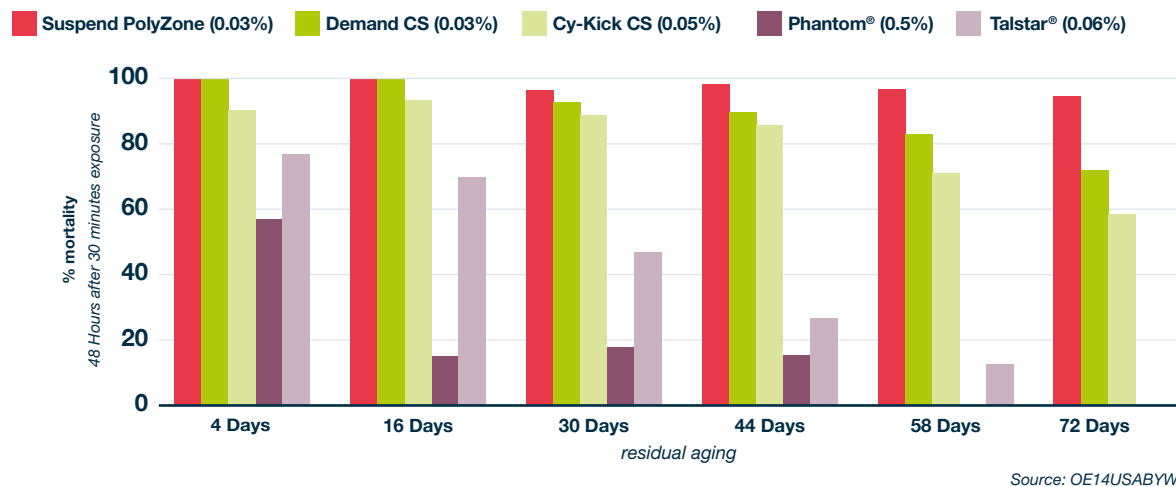

- // Known for its lasting residual and standing up to wet, dirty environments
- // Apply via crack & crevice or spot treatment along door moldings, edges of walls and shelving and furniture legs

*Suspend PolyZone delivers unstoppable staying power with excellent wash-off resistance.*

### Dirty, greasy surfaces tie-up AIs, making them unavailable.

Only Suspend PolyZone maintained efficacy above 90% for the entire 10 weeks.

### /// DeltaDust®

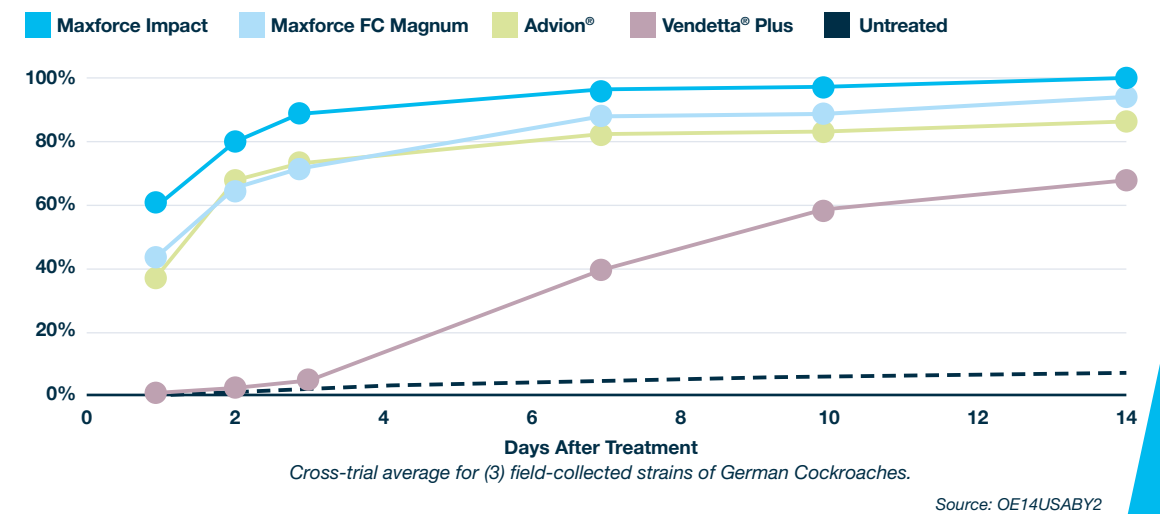

- // 100% waterproof dust that will not clump or absorb moisture in wet areas
- // Treat service ducts, false floors and ceilings as well as wall voids

### /// Maxforce®

- // Gel – Retains moisture and stays attractive, providing results even where sanitation is poor
- // Baits – Place next to walls around shelving, flush mounted under drawers and next to base of large appliances

*Maxforce offers control for bait averse/resistant strains of cockroaches.*

### /// Rodent Monitoring System

- // Wireless network of high-tech sensors that provides 24/7 monitoring and real-time rodent capture alerts

- // For use in sensitive, food-touching environments
