

Altus™

PRODUCT INFORMATION

Active Ingredient: Flupyradifurone 17.09%
IRAC Group: 4D
EPA Registration Number: 432-1575
Signal Word: Caution
Formulation: Soluble Liquid
REI: 4 hours (12 hours in CA)

Altus provides systemic, broad-spectrum control of sucking pests with flexible spray or drench applications made before, during or after bloom

Best Uses

- New foundational chemistry for managing whiteflies and aphids in ornamental crops
- Any stage of crop development, including before, during or after plant bloom
- Can be used in conjunction with IPM programs including many beneficials
- Greenhouses and nurseries on ornamental plants, vegetable transplants and indoor vegetable production

Attributes

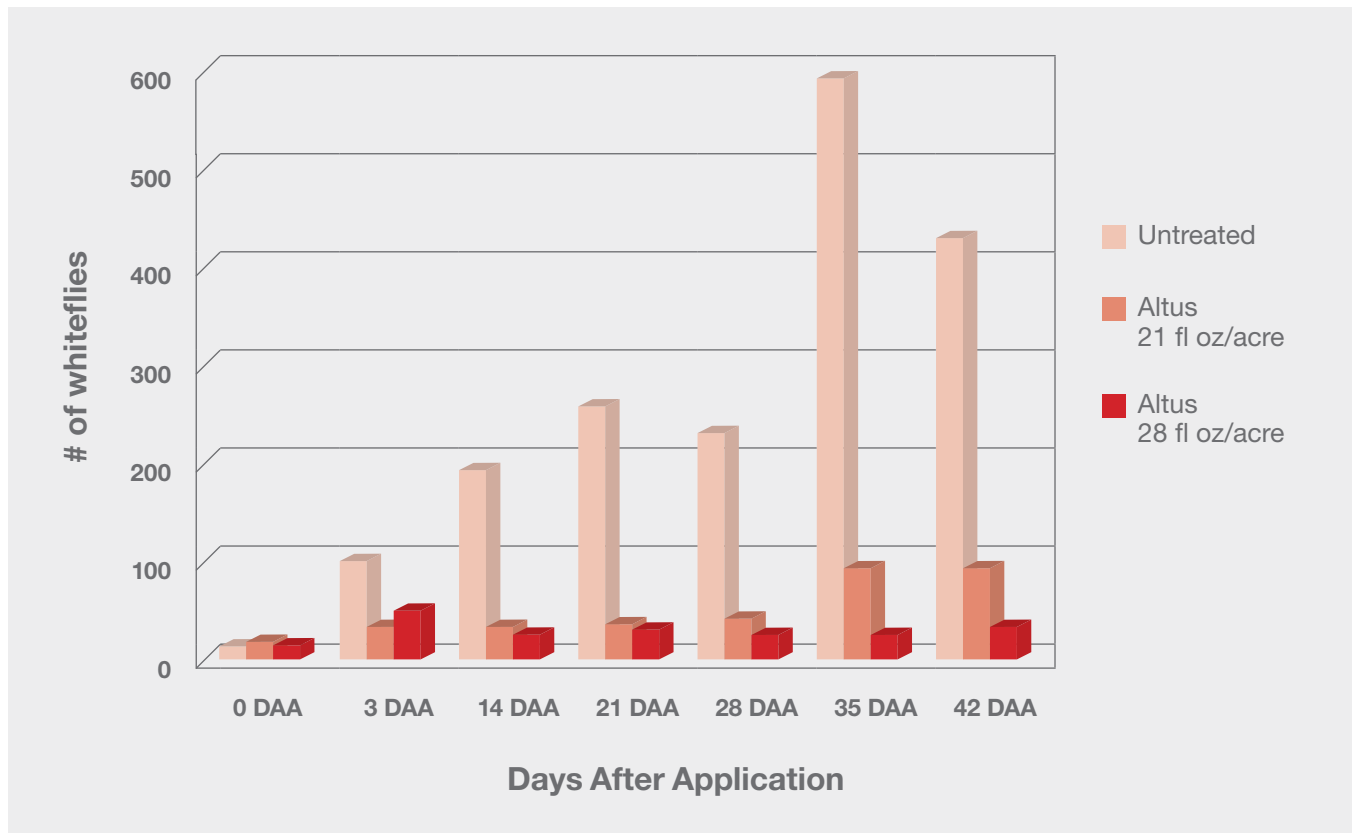

- Compatible with many beneficials, including honey bees and bumble bees.
- New, unique insecticide from butenolide class of chemistry
- Systemic and translaminar protection of existing and new plant growth
- Control of many sucking pests including whiteflies, aphids, leafhoppers, mealybugs, psyllids and hard and soft scales

Application Rates

For foliar applications, apply 7 - 14 fl. oz. / 100 gal. of water
For drench applications, apply 21 - 28 fl. oz. / acre

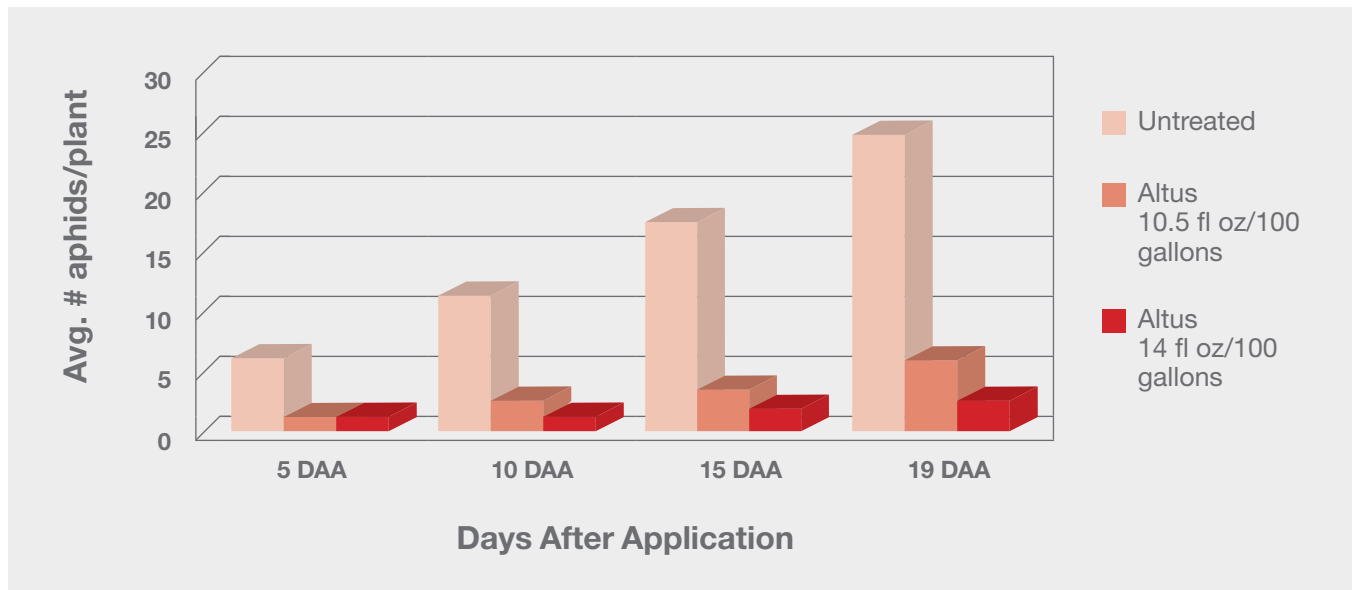

Whitefly Control in Poinsettia – Drench Application

Bayer Trial: IE09EITR0E5SF1, 2009

Aphid Control on Tomato Seedlings – Foliar Application

Bayer Trial: ID13MEXF39PCSB, 2013
